

CAR ALARM Z1

GSM GPS CAR ALARM WITH INTEGRATED MOTION SENSOR

Professional GSM GPS Car alarm is a modern vehicle security device which detects and followingly reports unauthorized movement of your vehicle. GSM module will enable you to communicate with your vehicle by mobile phone, receive information about intrusion into vehicle or its movement in form of voice call or text message, as well as to receive detailed reporting on internet (device status, movement monitoring, routes reporting).

Functions

- warning call is automatically dialed to preset numbers (4) after car movement is detected
- text message is sent with information about the status of the vehicle and position after alarm is detected
- possibility of remote control of relay by mobile phone by sending text message
- localization of the vehicle by GPS system and sending data via GPRS to server (www.gpsasistent.sk)
- possibility to connect Car alarm Z1 to pre-installed alarm
- routes reporting

Activation / deactivation

- alarm is activated / deactivated by starting of the vehicle
- by password-protected text message
- by RFID tag

Control of the vehicle status

On request, Car Alarm Z1 immediately sends text message about the vehicle status. It informs you also about the undervoltage of accumulator (practical especially in winter time) and about its disconnection.

Alarm

In case of alarm, Car Alarm Z1 sends text message (containing type of event, known position, number of driven km, direction) to maximum 4 preset phone numbers. Car alarm informs you about position of your vehicle. By sending text message it is possible to remotely control Car alarm's relay, for example switch on horn, or block the engine starter.

GPRS

Car alarm Z1 also supports GPRS transmission that allows more complex and effective use of functions. Car alarm regularly sends data (statuses, GPS positions, routes) to server www.gpsasistent.sk where you can monitor the effectivity of usage of your vehicle fleet.

Technical data

- Power supply: 12 V DC
- Stand-by consumption: less then 12 mA
- Max. consumption: 600 mA/ 12V
- GSM module: Tri band
- GSM/GPRS 900/1800/1900 Mhz
- Integrated GPS module
- Number of external inputs: 2
- Control: RFID tag
- Remotely controlled output (relay): 3,5A permanently, 5A for a short term
- Temperature range: -40°C up to + 85 °C
- Dimensions: 137 x 62 x 32 mm
- Weight: 120 g
- Integrated motion sensor
- Undervoltage sensor
- Accessories: back-up battery
